Protein Sequence Searches - February 2005

All of the sequence databases on ABSS have recently been updated.

- Please note that the curators of the UniProt database have purged some temporary accession numbers from the most recent version of UniProt. These sequences have been assigned new permanent accession numbers. The new UniProt record may not contain the previous temporary accession number.
- If you encounter an accession number from an older search run against UniProt (results file extension .rup) that can no longer be found in the database, the permanent record with the new accession number can be found by searching the old accession number in the UniProt Protein Archive database (UniPARC) at:

http://www.pir.uniprot.org/database/archive.shtml

If you have any questions regarding this information or your results, please contact any STIC searcher.

When submitting sequence search results for scanning into IFW, please include a copy of this attachment to assist any future Examiners or members of the public who may encounter UniProt temporary accession numbers.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   OM protein -
   Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

A;Title: The refined crystal structure of bovine beta-trypsin at 1.8 angstrom resolution A;Reference number: A92954; MUID:76072997; MUID:512

A;Contents: annotation; X-ray crystallography; binding sites for calcium, substrate, and C;Comment: Trypsinogen is synthesized in the acinar cells of the pancreas.

C;Comment: Autocatalytic cleavage after Lys-6 leads to beta-trypsin by releasing a termi specudotrypsin. A cleavage may also occur after Arg-105.

C;Superfamily: trypsin; trypsin homology

C;Keywords: hydrolase; pancreas; protein digestion; serine proteinase; zymogen f;1-229/Product: trypsinogen #status experimental <ZYM>

Submitted (OCT-2000) to the EMBL/GenBank/DDBJ databases.
-i-FUNCTION: Suggested to be involved in kindling epileptogenesis hippocampal plasticity.
-i-CATALYTIC ACTIVITY: Preferential cleavage: Arg-, Lys-.
-i-SUBCELLULAR LOCATION: Secreted.

RT "Serine proteases in rodent hippocampus.";

RL J. Biol. Chem. 273:23004-23011(1998).

CC -!- FUNCTION: Suggested to be involved in kindling epileptogenesis and CC hippocampal plasticity. Has a strong proteolytic activity against CC fibronectin (By similarity).

CC -!- TISSUE SPECIFICITY: Perferential cleavage: Arg-, Lys-.

CC --- SUBCELLULAR LOCATION: Secreted (By similarity).

CC --- TISSUE SPECIFICITY: Restricted to hippocampus.

CC --- TISSUE SPECIFICITY: Restricted to hippocampus.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    NRN RAT
